Friend Expense Manager

A Neutral Supervisor for Shared Expenses

Engineering Product Design • SPPU 2024

Domain

- FinTech
- Social Utility
- Personal Finance

Target Users

- Hostel Students
- College Friends
- Shared Living Groups

PROBLEM

- Friends frequently forget money they borrowed or lent to each other
- No transparent or reliable record of financial transactions
- Leads to misunderstandings, quarrels, and damaged relationships

Design Thinking Process

Empathize

Hostel friends forget shared expenses

Define

Need a neutral, transparent tracking system

Ideate

Smart expense & borrow reminder platform

Prototype

Mobile/web-based expense manager

Test

Accuracy, reminder effectiveness, user trust

PROPOSED SOLUTION

Friend Expense Manager Platform

Smart Borrow & Lend Tracking System

- **Record money borrowed or lent** between friends with complete transparency
- **System calculates balances automatically**, eliminating manual tracking errors
- **App acts as a neutral supervisor** instead of a friend, avoiding awkward confrontations

Key Features

Borrow & Lend Tracking

Friend-wise Balance Summary

System-Generated Reminders

Notes & Tags for Transactions

Group Expense Mode

Transparency & Trust

Clear Transaction History

Complete visibility of all past transactions

Context Notes

Add reason and context for every expense

No Personal Confrontation

System handles reminders, not friends

Impact & Outcomes

↓ 80%
Conflicts

↑ 95%
Transparency

↑ 85%
Trust Between Friends

↑ 90%
Convenience
