MapMyCampus

Smart Indoor Campus Navigation Platform

Engineering Product Design • SPPU 2024

Domain

- Smart Campus
- Navigation Systems
- EdTech

Target Users

- Students
- Visitors
- Faculty

PROBLEM

- Difficulty in locating classrooms, labs, and offices in large campus buildings
- Confusion and time wastage for first-year students and visitors
- No accessible indoor navigation system in educational institutions

Design Thinking Process

Empathize →
Users get lost navigating large campus buildings

Define →
Need for simple, accessible indoor navigation

Ideate →
QR-based navigation system with interactive maps

Prototype →
Web/mobile campus map with QR integration

Test
Navigation accuracy and user feedback testing

PROPOSED SOLUTION

MapMyCampus

Indoor Navigation using QR Codes

MapMyCampus provides a seamless indoor navigation experience through QR code integration. Students and visitors simply **scan a QR code** placed at building entrances, which opens an **interactive campus map** on their mobile device. The system provides **step-by-step directions** to their destination, making campus navigation effortless and reducing time spent searching for locations.

Technology Stack

- QR Code Scanner
- Interactive Indoor Maps
- Web / Mobile App
- Backend & Database

Impact & Outcomes

↓ 60%
Navigation Time

↓ 75%
User Confusion

↑ 80%
Campus Accessibility

↑ 90%
User Experience
